

**Large selection in D6 quality**

## Duplex stainless steel assortment

### The best choice for demanding applications

D6 combines the strengths of austenites and ferrites in a two-phase structure and therefore offers a powerful combination of strength and corrosion resistance.

With its classification in **resistance class IV (CRC IV - strong)** for components and fasteners Duplex stainless steel offers particularly good resistance to pitting and intergranular corrosion and is therefore perfect for challenging areas of application where chemicals, salt and sea water, oil and gas, high loads etc. are used.

Marinetech offers a comprehensive D6 assortment directly from stock for your individual designs.
